

Bureau of Professional Licensing Michigan Professional Licensing User System (MiPLUS) New Online System for Nursing Program

The Bureau of Professional Licensing (BPL) is transitioning to a new licensing and regulation platform and migrating from L2K to Accela. The new system will be called the Michigan Professional Licensing User System (MiPLUS). Below is a highlight of the features and what users can expect with the new online system:

All Users:

- Must have an account and have a valid email address to use the new system, this includes individuals filing a complaint or individuals applying and/or renewing a license.
- Users can maintain their accounts.
- Notices and information provided from the agency by email.

Applicants:

- Individuals applying for licensure for the first time will have to create an account and submit the license application online.
- There will be no more applications sent via US mail.

Licensees:

- Individuals who are currently licensed and wanting to renew their license will have to first create an account using a unique PIN code that will be sent by US mail from the agency at the end of July.
- The online system will allow the licensee, once an account has been created, to renew his/her license.
- Tracking of the license and any possible disciplinary actions can be done through the system.

Complaints:

- All complaints and employer reporting will be submitted online.
